

Center for Teaching & Learning Excellence (CTLE)

Patrick Tripeny, Director

Jill Stephenson, Student Course Feedback Program Manager

Our mission is to...

promote effective teaching and learning
through instructor/instructional
development at the University of Utah.

Who do we serve

- All Instructors at all levels
- Departments
- Colleges
- Research Groups
- Teaching Assistants
- Graduate Students
- Undergraduate Students

What can we do for you?

- Provide individual attention for a particular faculty or class.
- Provide departmental workshops on a particular topic related to instruction.
- Provide help in developing new curriculum.
- Provide evaluation services to evaluate curriculum.

What can we do for you?

- Work on educational objectives and evaluation tools on NSF and NASA Grants.
- Help you to develop effective peer evaluation processes for RPT.
- Provide workshops for teaching assistance.
- Help to develop a departmental Faculty Learning Community around teaching.

Student Course Feedback (SCF)

- Computerize system was developed by Administrative Computing Services (ACS) and implemented in 2003.
- In 2008, the University decided to hire a person solely committed to SCF and would be housed at CTLE.

Student Course Feedback (SCF)

- In 2010, the decision was made to either seriously overhaul current system or enter into an agreement with outside vendor.
- Summer 2011 an agreement was signed with OnlineCourseEvaluations.com (OCE).
- New system was used for the first time for final course feedback in Fall 2011.

Advantages of New SCF System

- All system updates and programming will be done by OCE.
- Student can access the the evaluation forms from a computer or through a mobile application and can reset their form if they make a mistake.
- Allows for a richer set of questions that can be asked.

Advantages of New SCF System

- Administers a dropped course feedback survey to students who dropped the course.
- Automatically emails reports to instructors and the end of the term.
- Gives instructor statistical data measures.
- Links qualitative questions with quantitative data.
- Gives instructor a rebuttal note field.

Advantages for Administrators

- Allows you to view the data in customized charts.
- Allows for setting of goals by faculty and administrators.
- Gives administrators a method of determining why students dropped classes.
- Allows for departments to ask more appropriate questions.

Future of Student Course Evaluations

- Link student demographic data with SCF data.
- Import historic data into system.
- Develop a new survey that more directly serves the needs of the various interested parties.
